Q8c)

Using ruler and compass only, construct a $\triangle ABC$ such that $BC = 5$ cm and $AB = 6.5$ cm and $\angle ABC = 120^\circ$

(i) Construct a circum-circle of $\triangle ABC$

(ii) Construct a cyclic quadrilateral $ABCD$, such that D is equidistant from AB and BC .

SOLUTION:

(i)

center of the circumcircle is the point of intersection of the perpendicular bisectors of AB and BC .

(ii)

the point D of the cyclic quadrilateral ABCD is the point of intersection of the angle bisectors of AB and BC and the circumcircle.
